## 4 Work Experience

### 4.1 Quind

Data Engineer Jun. 2023– Present Medellín, Colombia

Deployed an event driven architecture for structuring receipts unstructured information using Google's GEMINI LLM model.

Built a Data Lake House infrastructure for handling structured and unstructured business data.

### 4.2 Sistecrédito

Jr. Data Analyst / Data Engineer Jun. 2022– Dec. 2022 Medellín, Colombia

Created a Power BI data viz solution for the high executives with the purpose of depicting the company's most relevant metrics (sales, quantity, losses). It helped to improve overall decision-making processes and turned different areas to be more data driven.

Developed an ETL data pipeline for migrating a database with over 10 million + registries.

Portray the relational database model of the main database, improving the team's understanding of the database and the quality of the queries written.
